Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Monday 13 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Dry in the east, rain in the west.

Today:
Cloudy to start, particularly in the west. Patchy outbreaks of rain will then likely push north across the region in the morning, largely keeping to the west. The best of any dry spells toward the east coast. Maximum temperature 16 deg C (61 deg F).

Tonight:
Similar to the daytime, with a mostly cloudy spell and patchy outbreaks of rain. Rain most likely in the west with drier spells expected toward the east. Minimum temperature 10 deg C (50 deg F).

Tuesday:
A cloudy and damp start for most with patchy outbreaks of light rain. Cloud thickening as an area of heavy and persistent rain arrives from the south in the afternoon. Maximum temperature 17 deg C (63 deg F).

Outlook for Wednesday to Friday:
A damp start but improving picture on Wednesday as rain clears. Remaining dry through Thursday, with some brighter spells. Rain arriving from the west overnight into Friday, becoming breezier.
